

Our Purpose

The Transportation Planning division of Neighborhood Development Services (NDS) develops projects and policies to make the City’s transportation system one that expands mobility options and is reliable and affordable for all.

This division is responsible for developing the **Citywide Mobility Plan** and recommending policies, a multimodal network, and planning priorities to City Council.

Ben Chambers
Transportation Planning Manager

Tommy Safranek
Bicycle and Pedestrian Coordinator

Kyle Rodland
Safe Routes Coordinator

Zoë Macomber
Transit Planner

Roles and Responsibilities

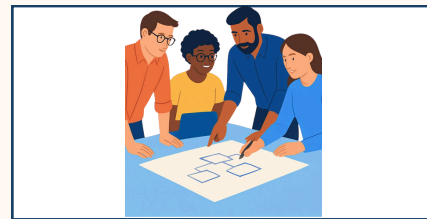

Transit

Leading regional and local transit planning efforts, including coordination with CAT, CARTA, and regional partners on transit service planning, governance, and the Transit Strategic Plan.

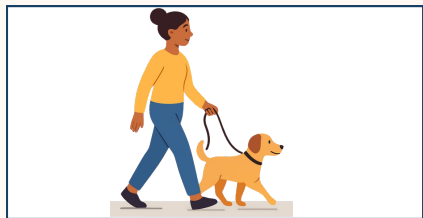

Schools

Leading the *Safe Routes to School* program: Infrastructure, education, and programming to help children walk and bike safely to Charlottesville City Schools.

Traffic Calming Projects

Providing expert input to Public Works for the Traffic Calming program, grounded in community-based input and best-practice safety principles for pedestrian and cyclist safety.

Sidewalk Priorities

Prioritizing sidewalk improvement projects to close gaps and ensure safe pedestrian access across all neighborhoods.

Corridor & Intersection Street Improvement Planning

Leading corridor- and intersection-level planning processes, including public communication and community engagement.

Biking and Walking

Promoting biking and walking through education, programming, the Cville E-Bike Voucher Program, and the City dockless mobility permit.
